WHERE CRYPTO GOES NEXT

TOKEN2049 Singapore explored crypto's next chapter—from the convergence of AI and crypto to onchain markets and the growing role of institutional capital. Speakers examined how AI agents could transform trading and payments, alongside developments in tokenisation and stablecoins.

Hyperliquid founder Jeff Yan took the main stage for "Hyperliquid: Rebuilding Finance from First Principles." Polymarket founder Shayne Coplan sat down with Balaji Srinivasan, who also joined Gemini co-founders Cameron and Tyler Winklevoss for "The Zcash Moment," putting privacy in focus.

Tom Lee made the case for a crypto spring turning into a full bull market. Raoul Pal returned with "The Exponential Age," while Arthur Hayes offered his market outlook.

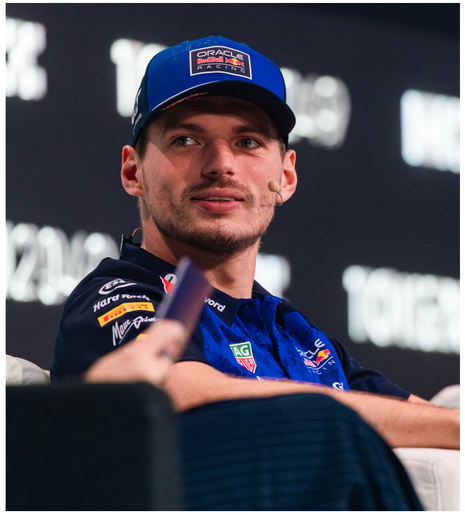

Nasdaq CEO Adena Friedman and Franklin Templeton CEO Jenny Johnson brought institutional perspectives to a program spanning tokenization, global liquidity and onchain settlement.

FORMULA 1 TAKES THE STAGE

As Singapore geared up for Grand Prix weekend, TOKEN2049 welcomed Lando Norris, Max Verstappen and Jenson Button—three Formula 1 world champions with six world titles between them. They shared the winning mentality behind those titles—what it takes to win and perform at the highest level.
